## Systems Administrator | Cloud & Infrastructure

Systems Administrator with 5+ years of experience managing enterprise IT infrastructure across cloud and on-premises environments. Specialized in Identity and Access Management (Okta, Active Directory) with proven success reducing onboarding time by 80% and achieving zero compliance audit findings. Expert in AWS cloud administration, security compliance (HIPAA/SOC 2), and maintaining 99.99% uptime for mission-critical systems. Strong background in healthcare and enterprise environments supporting 500+ users and managing multi-cloud infrastructure.

## PROFESSIONAL CERTIFICATIONS

**AWS Certified Cloud Practitioner** - Awarded by AWS, April 2021

**AWS Solutions Architect - Associate** - Awarded by AWS, September 2022

## CORE COMPETENCIES

- Identity & Access Management (IAM) | Cloud Infrastructure Administration | Security & Compliance
- AWS Cloud Services | Active Directory & Okta | HIPAA/SOC 2 Frameworks
- Windows & Linux Systems | Database Administration | Incident Response & Troubleshooting

## WORK EXPERIENCE

**Veri MedTech** - Denver, CO | 04/2024 - 08/2025 **Systems Administrator / Platform Engineer**

Role eliminated during company-wide restructuring and IT department downsizing (August 2025).

- Administered enterprise Okta IAM platform for 500+ users across 15+ SaaS applications, configuring SSO integrations using SAML and SCIM protocols
- Automated user provisioning workflows and lifecycle management, reducing employee onboarding time from 4 hours to 45 minutes (80% reduction)
- Implemented multi-factor authentication (MFA) policies achieving 100% user adoption and zero unauthorized access incidents
- Managed Active Directory integration and group policy administration for hybrid cloud environment
- Administered AWS production infrastructure including 50+ EC2 instances, RDS databases, S3 storage, and CloudWatch monitoring, maintaining 99.99% uptime
- Implemented security controls and access policies for HIPAA and SOC 2 compliance frameworks, achieving zero audit findings across 12-month audit cycle
- Configured AWS CloudWatch alerts and scheduled backup solutions using JetBackup to S3, reducing recovery time objective (RTO) to under 4 hours
- Migrated 10+ legacy on-premises servers to AWS cloud infrastructure, improving system reliability and reducing hosting costs by 30%
- Performed patch management, system monitoring, and troubleshooting for Windows Server and Linux environments while maintaining comprehensive technical documentation and SOPs for IAM processes and cloud infrastructure
- Collaborated with security team to perform vulnerability assessments and remediation efforts, reducing critical vulnerabilities by 60%

## **Pricefx - Denver, CO | 09/2022 - 03/2024 Infrastructure Administrator**

- Administered enterprise SQL Server and MySQL database clusters supporting 10,000+ daily users, executing version upgrades, patch management, and performance tuning
- Delivered 99.95% uptime SLA for production database infrastructure using Prometheus and Grafana monitoring with real-time alerting and rapid incident response
- Collaborated with development teams to troubleshoot complex application performance issues across AWS and Azure multi-cloud environment
- Managed database backup and recovery procedures, performing regular disaster recovery testing to ensure data integrity

## **Flexential - Boulder, CO | 06/2021 - 09/2022 Cloud Infrastructure Administrator**

- Served as technical cloud advisor for 20+ enterprise clients, designing and implementing secure AWS infrastructure solutions aligned with business and compliance requirements
- Deployed and configured AWS environments including VPCs, subnets, security groups, IAM roles/policies, load balancers, and CloudWatch monitoring
- Administered client cloud infrastructure, performing ongoing maintenance, security patching, and optimization to meet performance and cost targets
- Maintained 99.9% availability across managed client infrastructure by implementing CloudWatch monitoring, configuring alert thresholds, and 24/7 incident response protocols

## **IBM - Denver, CO | 12/2018 - 06/2021 System Support Representative**

- Installed, configured, and maintained 200+ physical servers, storage arrays, and networking equipment in enterprise data center environments
- Conducted hardware troubleshooting, diagnostics, and repairs on Dell, HP, and IBM servers, reducing mean time to resolution (MTTR) by 35%
- Provided 24/7 critical incident response and after-hours support, collaborating with cross-functional teams to restore services during outages
- Executed scheduled preventive maintenance on 300+ enterprise systems, performing regular hardware inspections and updates to ensure 99.99% infrastructure uptime

## **PROFESSIONAL SKILLS**

- Identity & Access Management: Okta Administration, Active Directory, Azure AD/Entra ID, SAML/SCIM Integration, SSO Configuration, MFA Implementation, User Provisioning & Lifecycle Management, Group Policy Management
- Cloud Platform Administration: AWS (EC2, S3, RDS, VPC, IAM, CloudWatch, ELB, Auto Scaling), Azure (Virtual Machines, Storage, Active Directory), Multi-Cloud Management
- Systems Administration: Windows Server 2016/2019/2022, Linux (RHEL, Ubuntu, CentOS, Debian), VMware ESXi, WHM/cPanel, Patch Management, System Monitoring, Backup & Recovery
- Security & Compliance: HIPAA Compliance, SOC 2 Frameworks, Security Controls Implementation, Access Controls & Policies, Vulnerability Management, Audit Logging
- Database Administration: MySQL, PostgreSQL, Microsoft SQL Server, Database Monitoring, Performance Tuning, Backup & Recovery
- Monitoring & Operations: CloudWatch, Prometheus, Grafana, Nagios, Incident Response, Change Management
- Scripting & Automation: PowerShell, Bash Scripting, Process Optimization, Workflow Automation
- Networking: TCP/IP, DNS/DHCP, VPN Configuration, Firewall Management, Load Balancers, Network Troubleshooting
